TO BE COMPLETED BY FUNERAL DIRECTOR

TO BE COMPLETED BY PHYSICIAN: MEDICAL CERTIFICATION

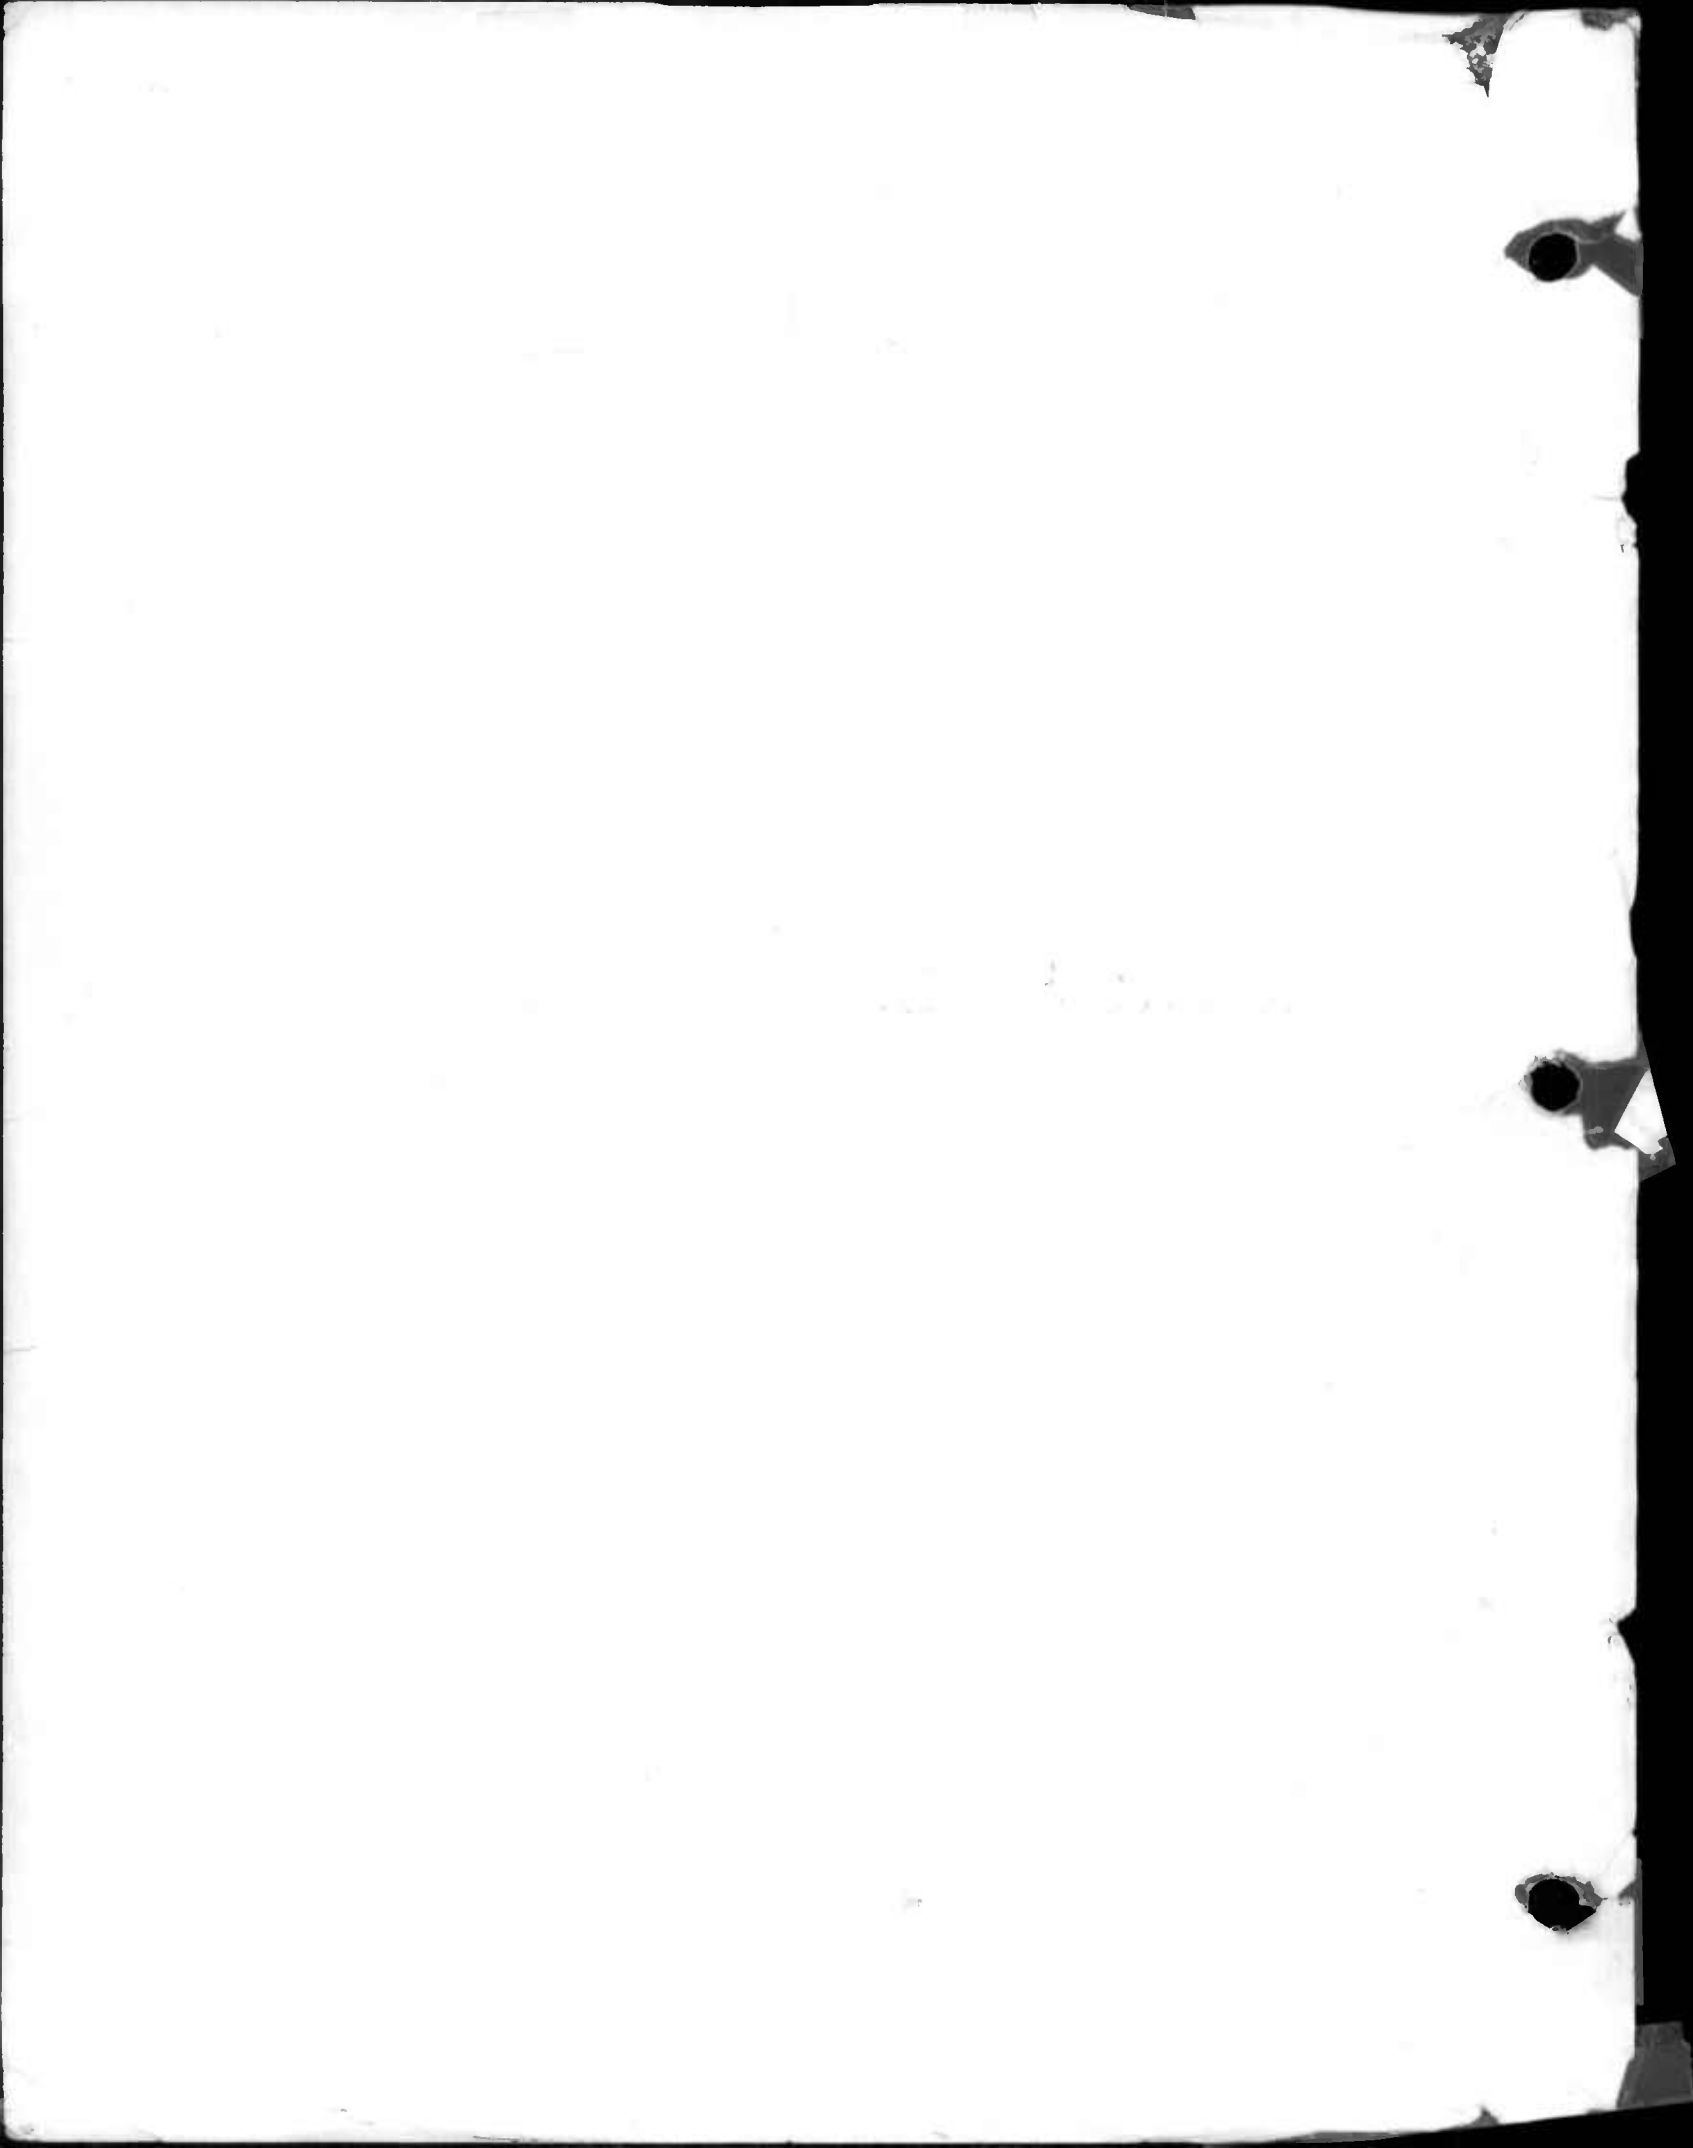

BALTIMORE, MARYLAND 21203-3146

DIVISION OF VITAL RECORDS, P.O. BOX 13146,

TO THE HOSPITAL OR ATTENDING PHYSICIAN: The law requires that the death certificate be executed within 24 hours after death. Page 6 may be retained by the hospital or attending physician.

TO THE FUNERAL DIRECTOR: After this certificate has been signed by the attending physician and completely filled in by the funeral director, page 5 should be detached for use as the burial-transit permit. Pages 6 and 7 should be filed within 72 hours after death with the State Dept. of Health and Mental Hygiene prior to burial, cremation, or removal.

IMPORTANT: If item 28 is marked, or item 23 shows any injury, or other traumatic event, the medical examiner must be notified at once.

Le premier point à considérer est la nature du terrain. Les données indiquent une zone à forte pente, ce qui implique des défis particuliers pour la construction et l'entretien des infrastructures. La seconde observation concerne la présence de zones humides, qui nécessitent des mesures préventives pour éviter les problèmes de saturation et de glissement de terrain.

En ce qui concerne les infrastructures, il est essentiel de planifier l'implantation des routes et des voies ferrées en tenant compte des contraintes topographiques. Les zones à forte pente doivent être renforcées par des techniques de stabilisation des sols, telles que l'usage de géotextiles ou de murs de soutènement.

La gestion des ressources humaines et matérielles est également un aspect crucial. Il faut s'assurer que les équipes de travail sont bien formées et équipées pour faire face aux conditions difficiles du terrain. La logistique doit être soigneusement organisée pour garantir l'approvisionnement en matériaux et en équipements.

Les données recueillies lors des relevés topographiques sont essentielles pour la planification des travaux. Elles permettent d'identifier les zones à risque et de concevoir des solutions adaptées à chaque situation.

Les conclusions de cette étude soulignent l'importance d'une approche globale et multidisciplinaire pour la planification des infrastructures dans des zones à forte pente. La collaboration entre les différents acteurs du projet est essentielle pour garantir le succès des travaux.

OHMM-16 Rev 1/89

1. The first part of the report is devoted to a general survey of the situation in the country. It is found that the country is in a state of general depression and that the people are suffering from want and distress. The cause of this is attributed to the war and the consequent disruption of the normal life of the country.

(1)

2. The second part of the report deals with the question of the relief of the distressed. It is suggested that the Government should take steps to provide relief to the people in the form of food and clothing. It is also suggested that the Government should take steps to provide employment for the people in the form of public works.

3. The third part of the report deals with the question of the reconstruction of the country. It is suggested that the Government should take steps to reconstruct the country in the form of a new constitution and a new system of government.

4. The fourth part of the report deals with the question of the future of the country. It is suggested that the Government should take steps to ensure the future of the country in the form of a new constitution and a new system of government.

5. The fifth part of the report deals with the question of the future of the country. It is suggested that the Government should take steps to ensure the future of the country in the form of a new constitution and a new system of government.
